

## MI Series

**MI-750** - The best choice for brighter procedure outcomes.

The ideal and surprisingly affordable, mid- sized light for minor surgery, procedures and exams. The MI-750 delivers maximum brightness, sharpness and color accuracy. So you can visualize your work in the most precise way. 3-stage dimming via the sterilizable handle lets you easily control brightness within the sterile field.

- 75,000 lux at 1 m • 4,300° K pure white • CRI 97
